ABOUT THE BRONZE

The Bronze floor plan would certainly take home gold for design! This ranch-style home centers around an open layout with a dining area, a kitchen with a center island, and a great room with center-meet doors leading to the covered patio. The master suite is adjacent, and showcases a generous walk-in closet and a private bath. Two bedrooms and a second bath complete the residence—which also includes an attached RV garage! Personalize the Bronze plan with an extended covered patio, or opt for a study in place of a third bedroom.

What's a HERS® Index? HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency.¹

A Projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.
