## ABOUT THE PEWTER

The ranch-style Pewter floor plan includes a very exciting feature—an attached RV garage! The interior of the home is just as attractive, and centers around an open layout with a great room with center meet doors to the covered patio, a dining area and a kitchen with a center island and a large walk-in pantry. Off the great room, the master suite showcases a walk-in closet and a private bath, and can be optioned with a door to the covered patio. Two additional bedrooms and a bath round out the residence. Make this dream home your own and opt for a study in place of the third bedroom.

**What's a HERS® Index?** HERS stands for Home Energy Rating System, a system created by RESNET® to measure home energy efficiency.®

A Projected HERS index or rating is a computer simulation performed prior to construction by a third-party HERS rater using RESNET-accredited rating software, rated feature and specification data derived from home plans, features and specifications, and other data selected or assumed by the rater. The projected HERS index is approximate and is subject to change without notice. Actual results will vary.
